Bounce TRACK

playlife-system.com

Bounce, bounce, bounce!

Add more excitement to your park with the Playlife Bounce Track. It combines our high-quality trampolines with various challenging obstacles. This obstacle course is popular in many countries thanks to the Big Bounce TV shows. Challenge your visitors with this new attraction!

Bounce Track: challenging and thrilling for all age groups

Featuring large obstacles and hanging elements, the Bounce Track is just as exciting and challenging as the Ninja obstacle course, with one main difference: trampolines everywhere! Obstacles such as climbing walls, blocks at various heights, and hanging cylinders create a course that is challenging for both young and old. These obstacles encourage jumpers to test their agility, endurance, strength, speed, and coordination. It's worth noting that the Bounce Track can easily be integrated into an existing trampoline park!

High quality, completely custom

All Playlife trampoline parks and attractions are made from high-quality materials. The Bounce Track is entirely customized to your preferences and can be designed to optimize the space in your building. Choose which parts you want and create your own unique Bounce Track! We're happy to show you all the possibilities.

Who holds the record?

The Playlife Bounce Track comes with a timing system that encourages your customers to achieve the best time. After starting the timer, visitors must navigate the obstacle course as quickly as possible. Who will be the fastest? Your visitors can try to beat their record by returning to your park regularly. It's the ideal marketing tool to generate repeat visits!

TriggerTrac Race Track Timer: Promotes competition and entertainment!

The TriggerTrac system is an easy-to-use timer that is perfect for the Bounce Track. By integrating a start button, timer, and finish button on the track, it enhances the competitive aspect. Highly recommended for added fun. Sounds and light effects can be integrated as well.
